TOWN WARRANT

THE STATE OF NEW HAMPSHIRE

To the inhabitants of the Town of Hancock, in the County of Hillsboro in said State, qualified to vote in Town Affairs

You are hereby notified to meet at the Town Hall in said Hancock on Tuesday, the ninth day of March next, at Nine of the clock in the forenoon, to act upon the following subjects:

1. To choose all necessary town officers for the year ensuing.
2. To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation for the same.
3. To see if the town will vote to accept the provisions of Chapter 117 laws of 1917, on a section of the Contoocook Valley road so called and appropriate or set aside from the amount raised for highway work the sum of \$500.00 for this purpose.
4. To see how much money the town will vote to raise and appropriate for the proper observance of Memorial Day and Old Home Week.
5. To see how much money the town will vote to raise and appropriate for the suppression of the Gypsy Moth.
6. To see how much money the town will vote to raise and appropriate for lighting streets.
7. To see how much money the town will vote to raise and appropriate for Trunk Line construction.
8. To see if the town will vote to build a permanent bridge and raise and appropriate money for the same.
9. To see if the town will vote to accept legacies and gifts given to the town in trust by different individuals, the income to be used in the care of Cemetery lots.
10. To see if the town will vote to accept legacies left to the town for any purpose.
11. To see if the town will vote to motorize the highway department and make provision for the same.

12. To see if the town will vote to extend the water main from Helen Kimball's to crotch of the road at A. M. Wood's residence put in one hydrant and raise and appropriate money for the same.

13. To see if the town will vote to buy a snow plow for the sidewalk and raise and appropriate money for the same.

14. To see if the town will vote to empower the common commissioners to purchase of James T. Weston his land at foot of Sand hill.

15. To see if the town will vote to raise and appropriate a sum of money for the suppression of the White Pine Blister Rust.

16. To hear reports of agents, auditors, committees or officers heretofore chosen and pass any vote relating thereto.

17. To see if the town will vote to raise and appropriate money to build a receiving tomb.

18. To see if the town will vote to extend town water to the cemetery.

19. To transact any other business that may legally come before said meeting.

Given under our hands and seal, this fourteenth day of February, in the year of our Lord nineteen hundred and twenty.

CLARENCE H. WARE,
GEORGE M. LOVEREN,
HAROLD E. STEARNS,
Selectmen of Hancock.

WATER COMMISSIONER'S REPORT

The Hancock Water Commissioners submit the following report:

New connections have been made for J. F. Eaton at the Balcom house, cost of same being \$8.85.

There has been collected in rents for the year ending February 1st \$691.43 and the following are unpaid:

Hancock Historical Society	\$4 00	
George H. Fogg	21 50	
Mrs. F. F. Fowle	4 50	
Mrs. Helen Fowle	8 75	
Geo. W. Hayward	2 00	
Thos. Lavoie	4 00	
Lydia D. Osgood	3 63	
Estate C. M. Sheldon	20 50	
Jane S. Washburn	2 00	
Mrs. F. O. Webber	5 88	
Frank A. Wood	18 00	
Mrs. E. A. Woodbury	5 13	
	<hr/>	\$99 89

Materials remaining on hand:

7 lengths 6 inch iron pipe 2590 lbs. at		
\$64.62 per ton	\$83 66	
1 set inside hydrant parts	15 00	
1—6 inch gate	15 00

		\$303 64

CORA A. OTIS
Treasurer.

SCHOOL REPORT

TO THE CITIZENS OF THE SCHOOL DISTRICT OF HANCOCK:

The School Board submit the following report ending Aug. 31, 1919, with a brief account of work until present time. The state requires us to make changes in our school houses to comply with the law. The changes at No. 7 will necessitate having paper removed from walls and probably new plaster, and out building moved and covered walk to that with a new door.

And No. 1 school house will require more windows and the varnished wood work in school rooms painted some light color.

Under the new law Hancock is now in a one supervisory district which voted to hire Mr. Leon E. Prior for district superintendent. We consider ourselves fortunate to have secured his services and feel that he is one of the best superintendents we have had. The teachers remained the same until Sept. 1, as in our last report. We commenced with the following teachers in September. Junior High, Miss Marion E. Stubbs at a salary of \$850. Miss Mabel E. Gibson at \$468. Miss Nellie M. Welsh \$648 and Miss Annie S. Welsh in No. 7 at \$540—for school year of 36 weeks.

We consider them all to be able, efficient teachers. We recommended the following sums to be raised, for the year commencing September 1, 1920, five per cent. of valuation of 1920, —\$1100 for High school tuition, \$130 for District Officers, \$50 for District Superintendent. Also the sum of \$500 for High school tuition for this year, and \$300 for repairs.

C. H. DUTTON,

ELLA C. WARE,

School Board.

Feb. 10, 1920.

SUPERINTENDENT'S REPORT

TO THE SCHOOL BOARD OF HANCOCK:

Herewith is submitted for your consideration my first annual report of the condition of your schools. My term of service with you began Sept. 1st, and this report is based on a knowledge of your schools gained since that time.

SCHOOL BUILDINGS

It is the policy of the State Board of Education that, in time, each school district in the state shall possess school buildings of an adequate standard, so that every child in the state may at-

tend a school in a sanitary building, suitably lighted, properly cared for, and adequately equipped with the requisite amount of school appliances necessary to conduct successfully the process of education. To this end certain minimum standards were set forth to which all buildings must conform. These standards, as I understand it, will be increased, with the idea in mind that each school district shall adopt a definite policy of school house improvements in order to meet these standards more fully from year to year. In this way, by taking one school building at a time, and by bringing it up to standard, it will not be long before each district will have a school plant of which it may be proud. It is quite necessary, therefore, that in the appropriations this year some definite step along this line may be taken.

For this purpose ascertaining how nearly the school buildings of the state conform to the minimum standards a survey of all one room schools was made. How do the buildings in Hancock stand in reference to these standards?

In regard to light the ratio between lighting area and floor space should be as one to five, or the lighting space should be one fifth of the floor space. In number seven the ratio is approximately one ninth. Another requirement is that the light shall enter from the rear and the left. In this building it enters from three sides. The building in the village conforms to requirements as regards the entrance of the light, but the lighting area is not sufficient compared with the floor space.

Papered walls are given only temporary approval, and the walls and ceilings must be tinted a suitable color. The number seven building has papered walls, and the ceiling is in need of repair, and will need retinting. In the Center building the requirements are met in this respect, with the exception of the ceiling, which is of a dark color at present.

In regard to toilets the regulations call for one in a sanitary condition, properly screened, suitably located, and treated regularly with some kind of disinfectant. At number seven the entrance to the toilet is gained by going outside of the school room to the rear of the building; the entrance to the boys' and girls' side is not screened, and the sanitary condition, while as good as the ordinary school toilet, does not meet the standard the State Board has in mind.

The toilets of the Center are of a better type, and with some minor repairs can be put in good condition. The entrance to these is from the basement of the building, through a covered passageway.

These are the three most prominent points in which actual conditions and proposed standards differ. Minor points exist,

but are more easily remedied, and can probably be financed out of the five per cent. allowed from school money. The three features mentioned will probably require a separate appropriation.

In spite of the defects mentioned in the buildings they are in a much better condition than the schools in many districts. The buildings were all cleaned during the summer vacation, thus providing a clean room to begin school in. This has an excellent effect both on the teacher and the pupils. We ought to go a step farther and provide for cleaning the floors and woodwork, where necessary, at least three times a year. The fall and spring house cleaning habit of the home, though performed at the expense of some comfort to the inmates, should be the rule at each school building, and should be executed with thoroughness. "Cleanliness is next to godliness," and if this ideal is to be instilled into the minds of the children we should see to it that his surroundings in school indicate our appreciation of the worth of the ideal.

ATTENDANCE

From an examination of the statistical table appended it will be noted that the total enrollment last year was 125, the average membership 101, average attendance 90, and per cent of attendance 69.1. The enrollment so far this year has been 107, and the per cent. of attendance approximately 92. It is to be hoped that we may be able to increase this per cent. for the remainder of the year. There is no reason why, unless some unforeseen circumstances arise, we should not reach the 94 or 95 per cent. mark, and if we could it certainly would have a marked effect on the progress of the children in school. Regularity in attendance is absolutely necessary to the steady progress of the child, and it vitally affects his attitude toward school. A day lost cannot be successfully made up, and if a child is allowed to stay out of school for trivial reasons he soon comes to regard school as a mere incident in his life, and not the main business of his childhood. A realization of the importance of this matter will bring about the desired improvement in attendance, I am sure. It is primarily a matter for parents to attend to.

THE HIGH SCHOOL

While the High School is not under the direct control of the district, yet the inhabitants have a vital interest in its welfare, not only from the fact that the seventh and eighth grades are incorporated in its organization, but also because they are sen-

sitive to everything that affects the welfare of the community. It is seldom that a community has the courage to undertake an enterprise of this kind, and it argues well for its progressiveness.

The work in the school this year is very satisfactory. The approval of the school by the State Department for the current year has just been received. This approval was withheld until the present time on account of the unsatisfactory attendance and tardiness record of last year, the per cent. then being 92 and the average tardiness being a little over five. This compared with a state average of 95 per cent., and an average tardiness of approximately one. This year, up to January 26th the school attained a per cent. of attendance of 95, and an average tardiness of about one, thus coming up to the state average. It is a matter of interest to all to see that this record is continued, and even improved, for the remainder of the year.

With the help of the trustees and some of the town's people the boys of the school have put a floor in the gymnasium, and sheathed the walls, making the place much more available for athletic games. The Headmaster reports that it is his intention to organize such games.

THE COURSE OF STUDY

The course of study as laid out in the state program is the one followed. In addition to this certain standards of attainment for the first three grades have been established by the State Board. It is expected that these standards will be met by the end of the school year in June. These standards are being met by the grades in your schools, and by the end of June they will have considerably exceeded them.

The complaint is made that many pupils come to the Junior High school not sufficiently prepared in some of the fundamental subjects. Emphasis is being placed on these subjects in an effort to remedy this condition. The first six grades are vital to the education of the child. Upon the thoroughness with which the work is done in these grades depends, to a large extent, his future progress.

TEACHERS.

Effective schools are dependent more largely upon good teachers than upon any other single factor. Equipment and buildings and physical conditions may modify the work, but without the good teacher all these other factors are of no avail. I am

glad to report that the work of the present corp of teachers is very satisfactory. They are well equipped for their work, and are preforming it in a thorough and effective manner.

How to furnish and maintain an efficient teaching force is a problem which confronts every school district in the state, and the country at large as well. The shortage of teachers has become critical, and it certainly is incumbent upon all to consider well how the crisis can be met.

The most obvious solution of the problem is a sufficient increase in salary to make the profession attractive financially in order to attract and hold capable men and women. This remedy is being applied, and it will have to be still more largely if the desired result is obtained. Salaries will have to correspond more nearly to the importance of the work performed and the skill and training necessary to perform it successfully. This is inevitable. There are other factors, also, which enter into the situation, such as the location of the school, the character of the boarding place, and the conditions under which the teacher is forced to live.

The average pay for the teachers of Hancock for the current year, that is, including the four paid by the district, is \$18.15 per week. Including the two in the High School who are paid by the Educational Association, the average salary per week is \$22.63. Could any other class of skilled workers, or unskilled for that matter, be obtained for this wage? And is any other work more important than the work they perform? In order to retain the present force of teachers, or to replace them by others equally skilled, an increase in salary will be necessary for the coming year. Already one of our grade teachers has received an offer for a position next year with one grade at from \$22 to \$25 per week.

The progress of the children in school is dependent upon many factors, not the least of which is the hearty cooperation of the home and the school. This can be brought about by a thorough understanding of the methods and ideals of each by the other. To this end it is hoped that the parents will find more opportunity to visit school and confer with teachers and school officials regarding the work of their own individual child. In this way the ideals of the home and the school can be unified and the work of both strengthened.

Respectfully submitted,

L. E. PRIOR,
Superintendent.

TREASURER'S REPORT OF SCHOOL DISTRICT

Carrie B. Ware, Treasurer in account with the Town of Hancock From Feb. 15, 1919 to Sept. 1, 1919.
